PROFESSIONAL SUMMARY

Aspiring UI/UX Designer with a strong focus on building efficient, scalable web applications both responsive and user-friendly. Experienced in designing clean architecture and user-friendly interfaces that solve real-world problems.

WORK EXPERIENCE

UI / UX Designer (Intern) — QualityPixels 2025-12 — 2026-04
Bengaluru

- Designed and developed a modern, pixel-perfect website UI using Figma, emphasizing intuitive user flows, clean layouts, and strong visual hierarchy to improve overall usability. Created reusable design systems and consistent components to ensure scalability and maintain design uniformity across pages. Conducted user-centric design iterations, focusing on accessibility, responsiveness, and seamless navigation across devices. Collaborated with developers to translate design concepts into functional interfaces, ensuring design accuracy and performance optimization.
- Delivered a visually engaging and user-friendly interface that aligns with brand identity and enhances user engagement.

PROJECTS

Portfolio Building [UI-Figma] - Portfolio UI using Figma <https://www.figma.com/design/eYfrhlfXsM5ZttvTbnsQYT/Portfolio>

- Designed and prototyped a personal portfolio website UI in Figma to effectively showcase projects, technical skills, and case studies. The design emphasizes a clean and modern aesthetic with a strong focus on visual hierarchy, typography, and spacing to guide user attention.
- Implemented responsive design principles to ensure seamless adaptability across desktop, tablet, and mobile devices. Carefully structured sections such as project highlights, about, and contact to improve content discoverability and user engagement.

PingMe Chat Application [UI-Figma] - PingMe UI using Figma <https://github.com/anbuchelvanvk/Chat-Application-Firebase-v1>

- Designed a modern and intuitive mobile chat application UI called PingMe using Figma, focusing on enhancing real-time communication experiences. The interface prioritizes usability with clean chat layouts, well-defined message bubbles, and intuitive navigation patterns.
- Created user flows for key features such as one-on-one messaging, chat lists, and message input interactions, ensuring a smooth and engaging user journey. Emphasized accessibility and readability through thoughtful color contrast, typography choices, and spacing.

Alan Expense Tracker - Alan Expense Tracker UI Using Figma<https://www.figma.com/design/6v0MZaE5HkVcXGqbcMW7H/Expense-Tracker>

- Designed a user-centric mobile UI for an Expense Tracker application using Figma, aimed at simplifying personal finance management. The interface features clean financial dashboards that present key insights such as spending patterns, categories, and summaries in a visually digestible format.
- Focused on intuitive navigation and minimal design to reduce cognitive load, allowing users to quickly add, track, and analyze expenses. Leveraged card-based layouts, clear icons, and consistent color usage to differentiate income, expenses, and categories.
